"Patient Knows Best" (from an article in *The Reader's Digest*) "A person's answer to the question, 'Is your health excellent, good, fair or poor?' is a remarkable predictor of who will live or die over the next four years according to new findings.

A study of more than 2,800 men and women 65 and older found that those who rate their health 'poor' are four to five times more likely to die in the next four years than those who rate their health 'excellent.' This was the case even if examinations show the respondents to be in comparable health.

The findings are supported by a review of five other large studies, totaling 23,000 people, which reached similar conclusions, according to Ellen Idler, a sociologist at Rutgers University, and epidemiologist Stanislav Kasl of Yale University School of Medicine, co-authors of the new study."
